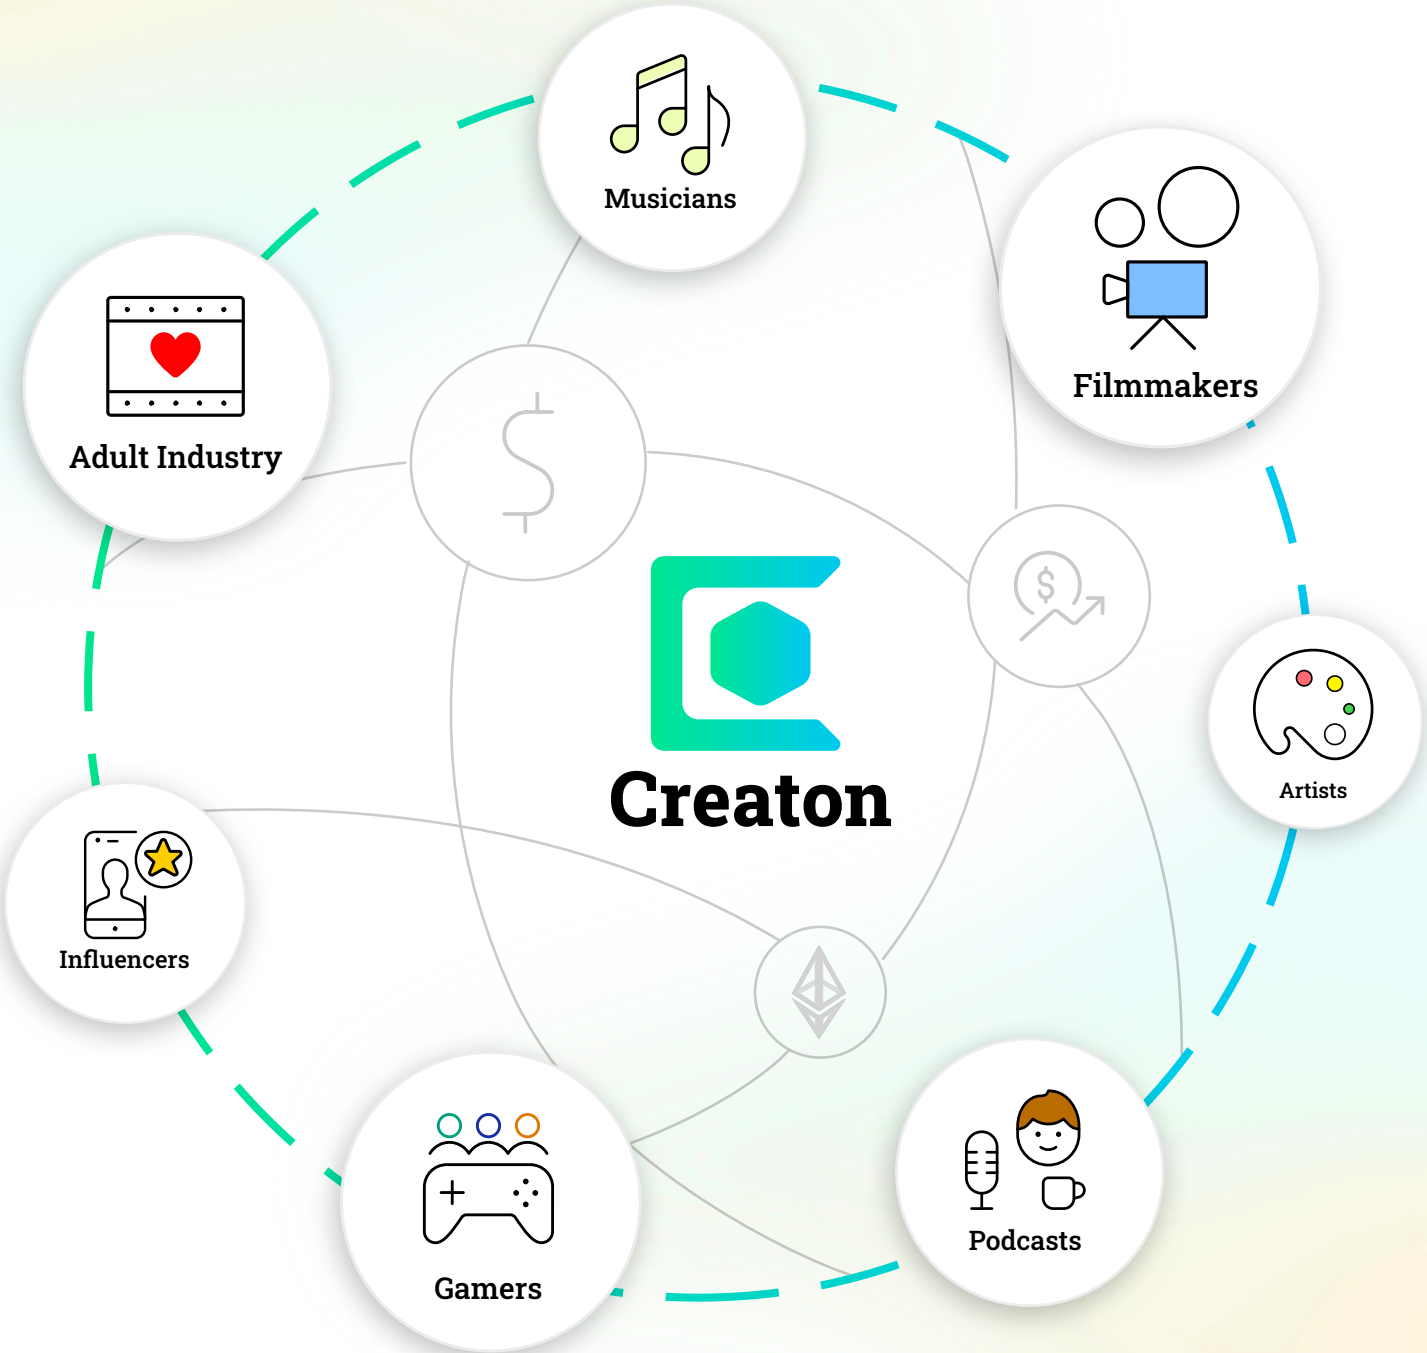
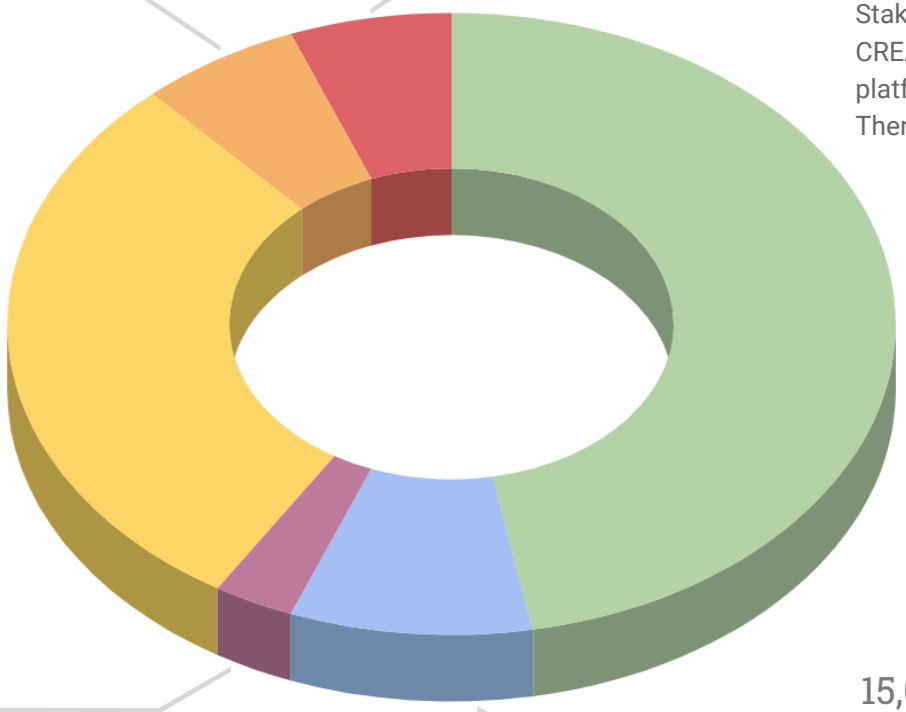
Target Market



Tokenomics

- CREATE token is the fuel of Governance and Yield Farming on Creaton.
- There will be a total amount of 170,000,000 CREATE (16,500,000 on launch).



Influencer Onboarding

20,000,000 (12%)

These funds will be used to incentivize well-known influencers to join the platform and kickstart Creaton publicity.

LP Farming Rewards

14,000,000 (6%)

Staking rewards for Liquidity Providers in CREATE pools to incentivize users to join the platform in the early stages of development. There will be 292k tokens farmable per month.

Early Investors

57,000,000 (33%)

These funds are to reward early investors who have funded the development team. They will be released via time locked smart contracts based on fundraise stage.

Team

60,000,000 (38%)

The Creaton team allocation is used to keep gradual development of the platform. The funds are released or burnt over 36 months using time-locked smart contracts.

Liquidity

4,000,000 (3%)

These liquidity funds will be locked to provide initial liquidity on the platform during launch and listing.

Advisors

15,000,000 (9%)

The advisors fund is designed to compensate them for the work performed on the protocols the platform relies on. These are released over 4 months time via time locked smart contracts.
